VYALEV® COMPLETE

Understanding your coverage

A guide to help you understand different types of insurance and how it may impact the coverage of VYALEV

USE

VYALEV is a prescription medicine used for treatment of advanced Parkinson's disease in adults. VYALEV contains two medicines, foscarbidopa and foslevodopa.

SELECT SAFETY INFORMATION

Do not use VYALEV if you take or have taken a nonselective monoamine oxidase (MAO) inhibitor within the last 14 days. Ask your healthcare provider if you are not sure if you take an MAO inhibitor.

Please see additional Important Safety Information on pages 10-11. Please see full **Prescribing Information**, including **Medication Guide**, or visit **https://www.rxabbvie.com/pdf/vyalev_pi.pdf**.

Insurance Overview

Health insurance helps cover the costs of maintaining your health and wellness.

What Health Insurance Can Cover

Medical Benefits

This refers to doctor and hospital visits, surgery, lab tests, mental health services, some devices, plus preventive care.

Pharmacy Benefits

This refers to coverage that helps pay for the cost of your prescription medications that may be separate from medical benefit coverage.

Types of Health Insurance

Commercial (Private)

Insurance offered by privately owned companies:

- Insurance you buy on your own
- Insurance provided by your employer
- An insurance plan you buy through "The Health Insurance Marketplace" provided by the Affordable Care Act (ACA)

Government

Insurance programs offered by the government:

- Medicare is primarily for people over 65, but you may be eligible earlier if you have a disability
- Medicaid for people in financial need
- Veterans Affairs benefits for military veterans
- TRICARE health plan for current and former service members and their families

We're here for you

This brochure focuses mainly on Medicare. If you have questions about commercial insurance or other coverage with VYALEV, just call the VYALEV Complete 24/7 Hotline at **1-866-489-2538**.*

*The 24/7 Hotline is staffed by nurses that are specifically trained on VYALEV and can be reached 24 hours per day, 7 days a week. After business hours, you may be asked to leave a message for a return call within 30 minutes.

Medicare

Medicare is health insurance for people 65 or older. You may be eligible to get Medicare earlier if you have a disability.

Overview of 4 Types of Medicare

Original Medicare			
PART A	**PART B**	**PART C**	**PART D**
Hospital Insurance	**Medical Insurance**	**Medicare Advantage**	**Prescription Drug Coverage**
• Hospital stays, including in-patient care and surgery • Stays at a skilled nursing care facility • Hospice care • Home health care	• Physician visits and provider services • Outpatient services and surgery (such as Ambulatory Surgical Centers or ASCs) • Some home health care • Durable medical equipment (such as external infusion pumps and supplies) • Preventive care • Certain other medical and health services not covered by Medicare Part A	• An alternative to Original Medicare (Parts A and B), these bundled plans include Part A, Part B, and usually Part D • Offered by private health insurance companies • May include additional benefits, such as vision and dental	• A separate coverage option that can be added to Medicare Parts A and B to help cover the cost of prescription drugs
If you have a Part A or Part B plan you can add **Medicare Supplement Insurance (Medigap)** or prescription drug coverage **(Part D)**. **Medigap** is private insurance that can help cover costs that Medicare does not cover.		If you have a Part C plan you can add prescription drug coverage **(Part D)**.	

You can change your Medicare choices during open enrollment each year.

For 2027, between October 15th and December 7th 2026, you can choose Original Medicare and possibly add Medigap, and choose or change a Part C or Part D plan.

For 2027, between January 1st and March 31st, you can switch to a different Medicare Advantage plan (Part C), switch to Original Medicare, and add a Part D plan.

To learn more, visit **Medicare.gov**. Call your local State Health Insurance Assistance Programs (SHIPs) to get FREE, personalized health insurance counseling. To find a SHIP in your area, visit **ShipHelp.org** or call **1-877-839-2675**.

How is my VYALEV covered?

How much you pay for VYALEV will depend on which Medicare plan you choose. This section will focus on Medicare Part B (medical insurance) and Part D (prescription drug coverage) and what the difference for coverage is.

Part B

- Once your deductible is met, you will pay **20% co-insurance** for VYALEV and **your plan will cover the other 80%**.
- VYALEV is covered under **Part B** with or without a **Medigap plan**.
- If you're enrolled in a **Medicare Advantage plan (Part C)**, your **Part B** services may be covered differently. Check your plan's specific rules, network, and costs.

Part D

- Covers drugs you take or administer yourself at home via retail or mail-order pharmacy separate from VYALEV.
- For 2027, the standard deductible for Part D will be **$0-$700**.
- For 2027, the maximum out-of-pocket for Part D will be **$2,400**.
- Part D prescription drug coverage does not cover VYALEV, but it may cover any other medications you take separately.

VYALEV is a subcutaneous infusion of foscarbidopa/foslevodopa delivered through a portable infusion pump. It's considered durable medical equipment (DME) and is covered under Medicare Part B.

VYALEV Complete

From the moment you are prescribed VYALEV, you'll have tools, resources, and support available to you through VYALEV Complete. Many of these tools and resources can be found on **VYALEV.com**.

VYALEV®
foscarbidopa/foslevodopa
Injection for subcutaneous use
12 mg/240 mg per mL

Why is my VYALEV covered by Part B?

Part B covers durable medical equipment (DME). Because VYALEV is given through a small external pump you wear that delivers your medication steadily throughout the day, it qualifies as DME.

Durable medical equipment (DME) is equipment your doctor prescribes to help you manage a health condition at home, like an infusion pump, wheelchair, or oxygen equipment.

To qualify as DME, the equipment generally needs to be:

- Built to last (able to hold up under everyday, repeated use)
- Prescribed for a medical reason
- Something you'd only need if you were sick or injured
- Meant for use in your home
- Expected to last at least 3 years

VYALEV qualifies because:

- Your doctor prescribes it as medically necessary
- You use it at home, not in a hospital or clinic

Since it meets these two conditions, Medicare Part B covers it as DME.

What is included in Medicare Part B DME benefit coverage for VYALEV?

- ✓ The pump
- ✓ Your VYALEV medication
- ✓ Administration supplies

USE

VYALEV is a prescription medicine used for treatment of advanced Parkinson's disease in adults. VYALEV contains two medicines, foscarbidopa and foslevodopa.

SELECT SAFETY INFORMATION

Do not use VYALEV if you take or have taken a nonselective monoamine oxidase (MAO) inhibitor within the last 14 days. Ask your healthcare provider if you are not sure if you take an MAO inhibitor.

Medicare Costs

Let's talk Medicare costs. The plan you choose will help with the cost of your care, but Medicare does not pay for all of it. You will pay a portion of the costs that are not covered—this is called "cost sharing."

Medicare Cost Sharing

Premium	Deductible	Co-payment + Co-insurance
The amount you pay for your health insurance every month.	The amount you will have to pay for your healthcare costs before your insurance starts paying.	**Co-pay:** Your share of the cost for a medical service or prescription that is a fixed amount. **Co-insurance:** The percentage of the cost that you will have to pay for a prescription or a medical service.
Medicare **Part A** is usually premium-free; most people pay **$0** premium If you don't qualify for premium-free **Part A**, you'll pay either **$311** or **$565** each month	Medicare **Part A** standard deductible is published each year. In 2026 the standard deductible was **$1,736**. This covers your share of costs for the first 60 days of Medicare-covered inpatient hospital care	Medicare **Part A** standard co-pays are published each year
Medicare **Part B** standard and income-adjusted premiums are published each year. In 2027 the standard premium is **$209.50** each month (or higher depending on your income)	Medicare **Part B** standard deductible is published each year. In 2027 the standard deductible is **$292**	Medicare **Part B** usually pays **80%** and you pay **20%** co-insurance; the percentage can vary by service
Medicare Advantage premiums vary by plan. You must also pay the Part B premium	**Medicare Advantage** deductibles vary by plan	**Medicare Advantage** co-pays and co-insurance vary by plan. Plans also have a yearly limit on what you pay out-of-pocket. Once you pay the plan's limit, the plan pays **100%** for covered health services for the rest of the year
Medicare **Part D** premiums vary by plan. You may also have to pay extra each month if your income is over a certain amount	Medicare **Part D** deductibles vary by plan; some plans don't have a deductible	Medicare **Part D** co-pays or co-insurance vary by plan

Check out **Medicare.gov** for a full fact sheet on 2027 Medicare costs.

Savings & Additional Financial Support

For Patients With Medicare or Other Government Insurance

Medicare Savings Programs (state-administered) help pay for Part A and Part B premiums, deductibles, co-insurance, and co-pays. To qualify for a Medicare Savings Program, you must have income and resources below a certain limit. You apply for Medicare Savings Programs through your state. When you apply, your state determines which program(s) you qualify for.

The Specified Low-Income Medicare Beneficiary (SLMB) Program helps pay for Part B premiums (you must have Part A & B to qualify).

For Patients With Commercial or Private Insurance Coverage

With the VYALEV Savings Program, eligible commercially insured patients may pay **as little as $0.*** Please call **1-866-489-2538** to speak to an Insurance Case Manager who can help you understand your out-of-pocket cost for VYALEV.

*Eligibility: Available to patients with commercial insurance coverage for VYALEV® (foscarbidopa/foslevodopa) who meet eligibility criteria. This co-pay assistance program is not available to patients receiving prescription reimbursement under any federal, state, or government-funded insurance programs (for example, Medicare [including Part D], Medicare Advantage, Medigap, Medicaid, TRICARE, Department of Defense, or Veterans Affairs programs) or where prohibited by law. Offer subject to change or termination without notice. Restrictions, including monthly maximums, may apply. This is not health insurance. **For full Terms and Conditions, visit vyalev.com/cost#terms or call 1-866-489-2538 for additional information. To learn about AbbVie's privacy practices and your privacy choices, visit https://abbv.ie/corpprivacy.**

Commonly used **insurance terms**

Cost-Sharing Methods:

- **Co-Insurance:** The percentage of the cost that you will have to pay for a prescription or a medical service.
- **Co-Pay:** Your share of the cost for a medical service or prescription that is a fixed amount.
- **Out-of-Pocket Maximum:** The most you have to pay for covered services in a plan year before you're fully covered.

Deductible: The amount you will have to pay for your health care costs before your insurance starts paying.

Durable Medical Equipment (DME): Equipment and supplies ordered by a health care provider for everyday or extended use. Coverage for DME may include: oxygen equipment, wheelchairs, crutches, or blood testing strips for diabetics.

Explanation of Benefits (EOB): A statement from the insurance plan that tells you what portion of the provider's charges are eligible for benefits under your insurance.

Health Insurance Benefits: The healthcare items or services covered under a health insurance plan.

Insurance Plans:

- **Commercial Insurance:** Plans typically sold to consumers directly or to groups/employers.
- **Government Insurance:** Insurance programs paid for and operated by the federal and state governments (examples: Medicaid, Medicare, and Veterans Affairs insurance).

Medicaid: A government insurance plan that offers health care coverage and drug benefits to low-income individuals.

Medicare: A federal government insurance plan that provides health care coverage options and drug benefits for persons over 65 years old, or disabled persons under the age of 65.

Open Enrollment: An annual period during which people can enroll in a group-sponsored health insurance plan.

Out-of-Pocket Costs: Your expenses for medical care that aren't reimbursed by insurance.

Pharmacy Benefit Manager (PBM): A third-party administrator hired by the insurance plan to manage prescription drug coverage/programs for its insured population.

Premium: The amount you pay for your health insurance every month.

Prescription Benefits: Covered prescription drugs, usually self-administered, such as oral, injectable, or taken in other ways outside the physician's office.

Prior Authorization (PA): The pre-approval process your insurance plan uses to ensure that your medicine is covered before your doctor orders it.

Use and Important Safety Information

USE

VYALEV is a prescription medicine used for treatment of advanced Parkinson's disease in adults. VYALEV contains two medicines, foscarbidopa and foslevodopa.

IMPORTANT SAFETY INFORMATION

What is the most important safety information I should know about VYALEV® (foscarbidopa/foslevodopa)?

Do not take VYALEV if you currently take or have recently taken (within the last 14 days) a medication for depression called a nonselective monoamine oxidase (MAO) inhibitor. Ask your healthcare provider or pharmacist if you are not sure if you take an MAO inhibitor.

Tell your healthcare provider about all your medical conditions and the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements. When used together, VYALEV and certain other medicines, including medications for high blood pressure, MAO inhibitors, antipsychotics, metoclopramide, and isoniazid, may affect each other and cause serious side effects.

VYALEV may cause other serious side effects. Talk to your healthcare provider before starting VYALEV and while on VYALEV if you have had or have any of the following:

- **Falling asleep without warning during normal daily activities.** VYALEV may cause you to fall asleep while you are doing daily activities, such as driving, which may result in an accident. This can happen as late as 1 year after you start VYALEV. Do not drive or operate machinery until you know how VYALEV affects you. Tell your healthcare provider if you take medicines that can make you sleepy, such as sleep medicines, antidepressants, or antipsychotics.
- **Seeing, hearing, or feeling things that are not real (hallucinations). This is a common and sometimes serious side effect.**
- **Unusual urges.** Some people taking medicines for Parkinson's disease, including VYALEV, have reported problems, such as gambling, compulsive eating, compulsive shopping, and increased sex drive.
- **Infusion Site Reactions and Infections.** Some people using VYALEV have had reactions and infections at the infusion site. **This is a common and sometimes serious side effect.** Remove your cannula and **call your healthcare provider if you have any of the following symptoms of an infection:** local spreading of redness, pain, swelling, warmth, change in color when pressing area, or fever. Take oral carbidopa/levodopa tablets until you are able to resume VYALEV.
- **Withdrawal-emergent fever (hyperpyrexia) and confusion.** Tell your healthcare provider if you have fever, confusion, or severe muscle stiffness after stopping VYALEV.
- **Uncontrolled sudden movements (dyskinesia). This is a common and sometimes serious side effect**. If you have new dyskinesia or your dyskinesia gets worse, tell your healthcare provider. This may be a sign that your dose of VYALEV or other Parkinson's medicines may need to be adjusted.
- **Vitamin B6 deficiency and seizures.** Tell your healthcare provider if you experience seizures. Carbidopa/levodopa therapies, including VYALEV, may decrease vitamin B6 levels, and severe vitamin B6

Please see full **Prescribing Information**, including **Medication Guide**, or visit **https://www.rxabbvie.com/pdf/vyalev_pi.pdf**.

VYALEV®
foscarbidopa/foslevodopa
Injection for subcutaneous use

Use and Important Safety Information (cont.)

deficiency can lead to seizures. Other symptoms of vitamin B6 deficiency include depression, confusion, cracked or swollen lips or tongue, rash, low red blood cell count, and/or numbness, tingling, or weakness in the extremities.

- **Heart attack or other heart problems.** Tell your healthcare provider if you have had increased blood pressure, a fast or irregular heartbeat, or chest pain.
- **Worsening of the increased pressure in your eyes (glaucoma).** The pressure in your eyes should be checked after starting VYALEV.

Do not stop using VYALEV or change your dose unless you are told to do so by your healthcare provider.

These are not all the possible side effects of VYALEV. For more information, ask your healthcare provider or pharmacist.

VYALEV (foscarbidopa and foslevodopa) injection for subcutaneous use is available in a 120 mg foscarbidopa and 2,400 mg foslevodopa per 10 mL (12 mg foscarbidopa and 240 mg foslevodopa per mL) solution.

Please see the full Prescribing Information, including Medication Guide, for additional information about VYALEV. Talk to your healthcare provider if you have questions.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.

If you are having difficulty paying for your medicine, AbbVie may be able to help. Visit AbbVie.com/PatientAccessSupport to learn more.
